Denver, the capital of Colorado, is an American metropolis dating to the Old West era. Larimer Square, the city’s oldest block, features landmark 19th-century buildings. Denver is also a jumping-off point for ski resorts in the nearby Rocky Mountains.

**DENVER - THE MILE HIGH CITY, REALLY IS EXACTLY ONE MILE HIGH.**

By an amazing stroke of good luck, the 13th step on the west side of the State Capitol Building is exactly 5,280 feet above sea level - one mile high. In Denver's rarified air, golf balls go 10 percent farther. So do cocktails. Alcoholic drinks pack more of a punch than at sea level. The sun feels warmer, because you are closer to it and there is 25 percent less protection from the sun.

The Mile High City is also extremely dry, so it is a good idea to drink more water than usual. With less water vapor in the air at this altitude, the sky really is bluer in Colorado.

**DENVER IS NEAR THE MOUNTAINS, NOT IN THEM.**

Denver is located on high rolling plains, 12 miles east of the “foothills,” a series of gentle mountains that climb to 11,000 feet. Just beyond is the “Front Range of the Rocky Mountains,” a series of formidable snowcapped peaks that rise to 14,000 feet. Denver might not be in the mountains, but the mountains still dominate the city. The picturesque mountain panorama from Denver is 140 miles long. There are 200 visible named peaks including 32 that soar to 13,000 feet and above. State law prohibits building any structure that would block the view from the Colorado State Capitol. Penetrating the mountains west of Denver required building the highest auto tunnel in the world (Eisenhower Tunnel) and the sixth longest railroad tunnel in the country (Moffat Tunnel).

**DENVER BREWS MORE BEER THAN ANY OTHER CITY.**

The first building in Denver was a saloon, so it’s natural that Denver would become a great beer town. Coors Brewery is the world’s largest. Denver’s Great American Beer Festival is the largest in the nation, offering more than 6,700 different beers for tasting. The Wynkoop Brewing Company is one of the largest brewpubs in the country. On an average day in the Denver Metro area, more than 200 different beers are brewed and can be enjoyed in more than 150 breweries, brew pubs and tap rooms.
This year’s ASRM Scientific Congress & Expo theme is “Focus on the Next Generation.” As the theme implies, this Congress will focus on the outcomes of our treatments, highlight and promote the next generation of professionals in reproductive medicine, and introduce us to new technologies and up-and-coming research. Dr. Anuja Dokras, Chair of the Scientific Congress Program Planning Committee, Dr. H. Irene Su, Chair of the Pre-Congress Program Committee, and their teams have designed a comprehensive, provocative program for Congress attendees. The agenda ranges from the latest molecular and genetic technologies to advocacy for our patients and access to care. The program is designed to address the educational and practice needs of physicians, nurses, andrology and embryology laboratory personnel, genetic counselors, social workers, practice and laboratory managers, as well as practitioners in mental health, law, and ethics. Importantly, for the first time, and in order to forge a closer relationship with our sister society, the Society for the Study of Reproduction (SSR), a pre-Congress course entitled The Germ Cell Environment and Its Impact on Gamete Quality and a symposium entitled Hallmark of the Aging Egg – More than Chromosomes and Mitochondria, have been incorporated into the program.

The Scientific Congress Continuing Medical Education (CME) course offerings will include plenary lectures, symposia, and interactive sessions, all supporting the theme of the Congress. Historical perspectives will again be presented, as well as innovative lectures on therapeutic editing of the human embryo, politics and ethics in assisted reproductive technology, newest research in contraception, menopausal therapy, and the basic science of spermatogenesis and embryo development. Speakers also will address fertility preservation for the cancer patient and transgender care, provide perspectives on clinical research, and the funding of research, and challenge the experts at Fertility and Sterility®.

The interactive sessions are designed to energize and stimulate discussion and interaction among participants, as they focus on a wide range of controversial topics. CME sessions will be complemented by non-CME activities including intimate, in-depth luncheons with recognized experts in our highly successful Expert Encounters; roundtable luncheons covering the breadth and depth of reproductive medicine; and oral and poster-format scientific abstract presentations, representing cutting-edge research in reproductive medicine and biology. Symposia will include those organized and presented by our international sister societies. The Pre-Congress Program Committee collaborated with our affiliated societies and professional and special interest groups to present a wide range of Pre-Congress courses designed to meet the needs of clinicians, scientists, laboratory technologists, nurses, and other health-care and allied professionals.

We welcome our members, trainees, and colleagues from around the world to the ASRM 2018 Scientific Congress & Expo! We value your participation and engagement, and hope you will take advantage of the opportunities provided by the meeting to interact and network with colleagues.

I look forward to seeing you in the exciting city of Denver, where together, we will be “Focusing on the Next Generation.”

Sincerely,

Christos Coutifaris, M.D., Ph.D.
ASRM President, 2017-2018
Add to what you know — on the go!

The ASRM QBoost question bank is designed to help members better retain information from specific ASRM Practice Committee documents and educational materials.

QBoost uses an educational strategy known as spaced learning, which is popular because it’s fun, convenient, and it increases knowledge retention. Questions will be sent to you via email or to your personal device via the program app.

Stop by the ASRM Education kiosk to learn more, or follow the instructions on the back of this card to enroll.

Ready to discover QBoost? Enroll in a 5-question QBoost demo and enter to win a drawing for a $100 Amazon gift card when you bring the QBoost delegate packet insert to the ASRM Education Kiosk, Booth #741.

You must be an ASRM member to enroll in the QBoost demo. The drawing will take place 10/10/18 during the first Congress break. You do not have to be present to win. One entry per attendee.

2018 Resident Education Program*

Purpose
ASRM is committed to facilitating and promoting education of reproductive-health professionals at all levels. As part of this mission, the Society develops and coordinates educational activities for resident physicians in training in reproductive medicine. The program emphasizes the understanding of complex topics, the interaction with other disciplines, and the psychosocial sequelae and ethical concerns in human reproduction. Residents will also be exposed to a variety of interactive educational methods and have an opportunity to network/interact with faculty with expertise in the specific topic for the day.

Description
ASRM has organized an education program consisting of two parts:
1. Medical Education: A series of educational sessions coupled with corresponding scientific symposia. On two days of the Scientific Congress, there will be interactive educational presentations corresponding to a symposium on each of those days. The activities will be evidence-based, free from bias, and independent of commercial influence. The discussions, which will utilize different learning pedagogies, will require advance independent study of articles, videos, or handouts relevant to the topic of ~20 minutes. Fifteen minutes are reserved at the end of these sessions for interaction with fellows who are also attending the sessions.
2. Networking/Interaction with Fellows: Fellows will attend the educational sessions as peer faculty. Learners are encouraged to ask questions about the fellowship interview process and the panelists’ experiences.

Procedure
1. Residents will register online for the program during their regular registration process by checking YES on the invitation that will appear for all registrants who designate “resident” as their practice code. There is no charge for participation.
2. Registrants will receive an email 2 weeks in advance of the Scientific Congress with a link to materials to prepare for the learning sessions and symposia.
3. A boxed lunch is provided for learners Monday through Wednesday at the lunchtime learning sessions.
4. On Monday and Tuesday of the Scientific Congress, registrants will gather for an interactive learning session with a prominent medical educator and content expert(s) from the day’s corresponding symposium. Each day will employ an interactive learning modality that will require a small amount of advance preparation. Those sessions will include an opportunity to interact with current fellows throughout the session. Registrants are encouraged to attend the afternoon symposium corresponding to the day’s learning session on Monday and Tuesday.
5. On Wednesday, the session will be comprised of experiential breakout groups using the embryo-transfer simulator and simultaneous, stand-alone interactive learning sessions on various topics.
6. After the Congress, registrants will receive a survey.

The evolution of ASRM online learning is here!

ASRM airLearning™ will make your online learning more accessible, interactive, and responsive.

Features and benefits include:

**Easier access.** Navigate straight to your learning dashboard!

**New features.** See your course progress, move easily through a multi-module course, and claim credits immediately.

**Improved functionality.** The new platform operates more smoothly, is mobile friendly, and is intuitive for learners.

Best of all, most courses are still FREE for ASRM members!

ReproductiveFacts.org is a trusted source of information designed for patients and consumers to explore all topics related to reproductive health through fact sheets, patient education booklets, infographics, videos, and FAQs.

Did you also know that our patient education materials:

- Are free to download and print
- Are regularly peer-reviewed and updated
- Include videos on infertility, sexuality, fibroids, endometriosis, osteoporosis, menopause, male fertility, and more
- Include almost 100 fact sheets/booklets each, in English and Spanish, and 11 booklets in Chinese
- Cover a wide variety of topics including fibroids, laparoscopy, endometriosis, osteoporosis, menopause, infertility, and sexuality
- Can be translated to more than 100 languages with the click of the mouse using the Google Translate widget (embedded on the page)

ReproductiveFacts.org is from the American Society for Reproductive Medicine

An Untapped Resource for Your Patients?

ASRM encourages you to link to ReproductiveFacts.org materials and videos and post infographics on your own websites!
